FIgma Prototype Set-Up

VOL. 01

Figma Design • Web edition (auto-updated)

Set up your Figma classroom in a few clear steps.

Create an account, verify as an Education account in Figma For Education, set up a team, and get everyone into the shared team folder.

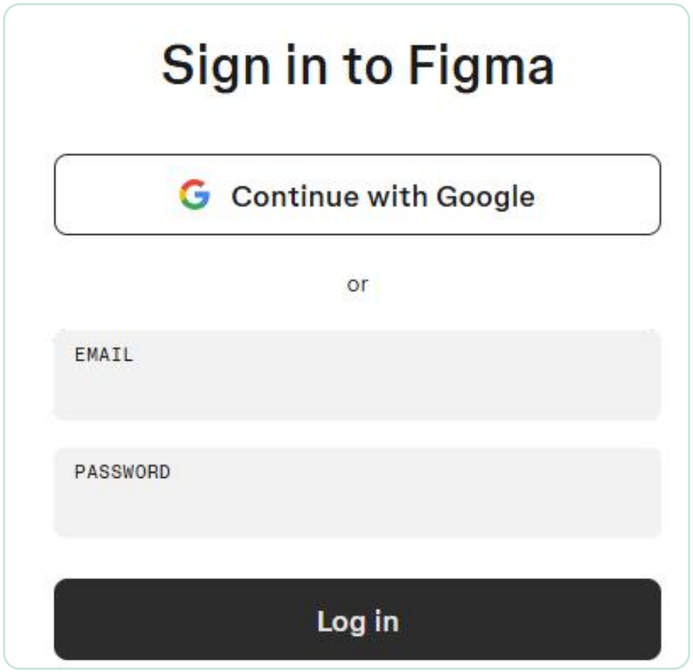

Problem

We need to design and prototype the UI for Excalidraw's front-end features before implementation.

This lets us review the layouts and user flows, gather feedback, and resolve usability issues before development begins.

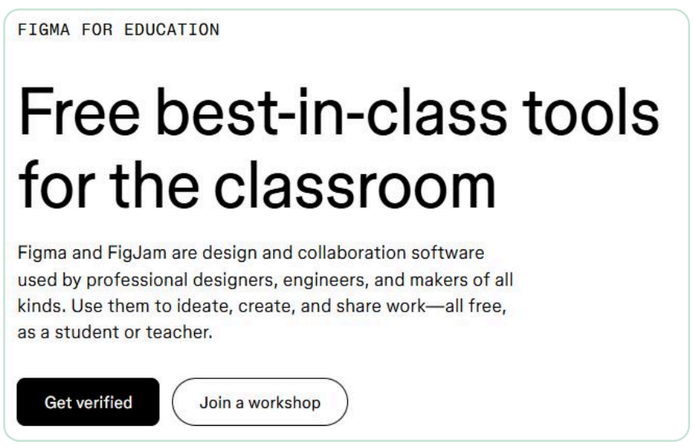

01 Create a Figma account

Start by creating a Figma account. This is the first step before you can verify your account and set up a team.

02 Verify as an Education account in Figma For Education

Complete the verification flow in Figma For Education so you can access the Education plan for your team.

03 Team setup

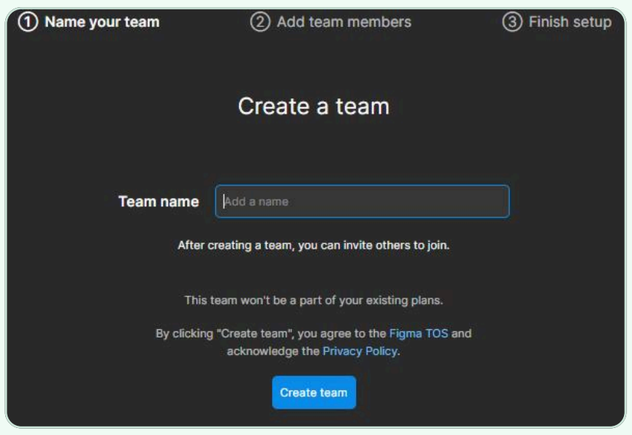

Choose one route: create a team if you will own it, or join a team if someone else has already created it.

3a. Create team

a1 On the left side, click on your private account team
Open the sidebar and locate the team area.

a2 Click create team
Start the team creation flow from the sidebar.

a3 Name team
Give your team a clear name so it is easy to recognize.

a4 Invite other members now, or do it later
You can add teammates immediately or come back to invitations after the team is created.

a5 Pick the free Education Plan for team available for education accounts
Select the Education plan available for education accounts when you set up the team.

Cost and plan limits

Starter: $0. Unlimited drafts; up to 3 collaborative files, with 3 pages per file.

Education: $0 for verified eligible students and educators. Requires classroom status and a school email; team editors must verify within 7 days.

Education access: 1 year for high-school/ higher-ed students, 2 years for educators, 6 months for bootcamp students. Reverify to retain access. These are eligibility limits—not Starter's file limits.

Pro: (Full - $16, Dev - $12, Collab - $3)
Organization: (Full - $55, Dev - $25, Collab - $5)
Enterprise: (Full - $90, Dev - $35, Collab - $5)
Full Seat (All Feature)
Collab (FigJam, Figma Slides, Figma Buzz)
Dev (Collab + Dev Mode)

3b. Join team

b1 Email
Provide your account email to the team creator so they can invite you.

b1a Provide team creator with your account email so they can invite you
Share the email address associated with your Figma account.

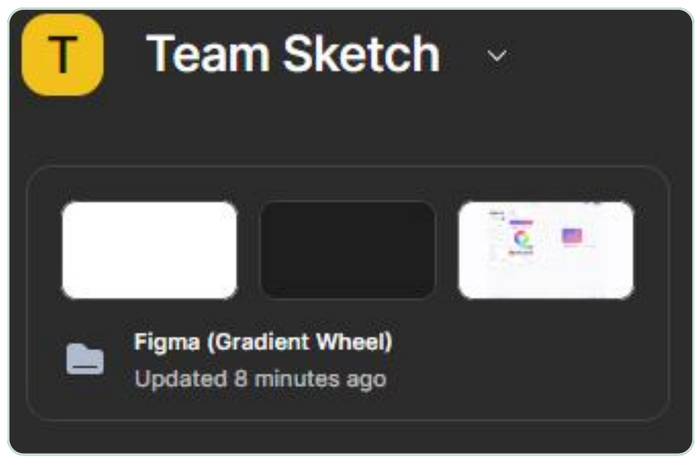

b1b Accept the invite
Open the invitation email and accept it to join the team.

b2 Link
The team creator can send a link instead of an email invitation.

b2a Team creator sends link and you click to accept
Open the shared link and follow the prompts to join the team.

04 Once in the team, you have access to the team folder where work can begin

After you create or join the team, you will see the team folder. This is where shared files and class work can be organized.
